EVALUATION AND RESEARCH DESIGN

PROGRAM EVALUATION VS CLINICAL RESEARCH

- Decide whether to accept a new program or service
- Decide whether to continue, change, or eliminate an existing program or service
- Examine the uniformity of program implementation with program plan
- Assess the overall value of a program
- Help funders and stakeholders determine the ways in which issues are being solved or needs met.

(Gant, 2017)

PROGRAM EVALUATION VS CLINICAL RESEARCH

Inform decisions, clarify options, specify improvements, and provide informations about programs and policies within the social and political context.

Step 5: Disseminate Findings and Materials

Step 4: Test Effectiveness in a Variety of Practice Settings

Step 3: Refine and Confirm Program Components in Tests

Step 2: Create and Revise Program Materials

Step 1: Specify the Problem and Develop a Program Theory
